SCHOOL PANTOMIME

1.

Last year a few students, with the help of some teachers, decided to prepare a pantomime and show it to our school. Their choice was Shrek – the famous, friendly ogre who falls in love with Princess Fiona. He saves her from a dark castle and fights with the bad character Lord Farquaad.

2.

Our English teacher prepared the script. He worked with the students very hard for three months. They tried different ways of acting the scenes to help the audience understand the story. They also learnt how to use face and body language to express their characters' feelings.

3.

Parents also helped the students playing in the show. They prepared amazing clothes for each character. Shrek looked like a real ogre and Princess Fiona wore a beautiful dress. Donkey had a mask and Lord Farquaad a wonderful red coat.

4.

The students also had to prepare the stage for the show. Our art teacher helped them to make lots of large green paper trees to create a forest in the hall. There was also a castle with brown walls made of cardboard. Everything was carefully painted, so it looked great.

5.

On the day of the show, the hall was full of people: students, teachers, parents, brothers and sisters who came to school to see the pantomime. Everyone laughed a lot. When the show finished, everybody clapped for ten minutes. The children loved it. The show was a big success.

HITCHBOT, THE TRAVELLING ROBOT

It was an international sensation. Kids loved it. Adults loved it. Journalists followed its every move. Its name was HitchBOT and it was a hitchhiking robot created by a group of scientists from Canada. It sat near the road waiting for drivers to give it a free ride. It travelled across Canada and it also visited Europe: Germany and the Netherlands.

There was nothing scary about its looks. In fact, it looked rather funny with bright yellow boots, green gloves and a round body made of a blue plastic bucket. It was designed to be strong and not easy to break. Any driver who offered HitchBOT a ride had to carry it to his car because the robot could not move on its own. But they could chat to it because the robot could recognise speech and talk with people.

Did HitchBOT make any friends? Well, lots of them. A man and a woman who picked it up near Calgary took it to their friends' wedding party. It travelled with a rock band in Germany, but it couldn't go to their concert. It went fishing, camping, sightseeing. HitchBOT posted photos and videos from its journey on social media. When it completed its trip, the robot became part of an exhibition in a science museum.

"This robot was a social experiment. We wanted to see if people will help robots and how they will treat them," explained the creators of HitchBOT. The results were great. With the help of friendly drivers HitchBOT was able to complete its journey.

Would you give a ride to a hitchhiking robot?
